Premium Solutions for a Cleaner and Healthier Environment

This ready-to-use odor counteractant instantaneously controls offensive odors and replaces them with a pleasant lavender fragrance. Specially formulated with patented, environmentally preferred odor counteractant technology that entraps airborne malodor molecules fast and effectively. Utilizes PURE USP water that makes it safe to spray on most surfaces not harmed by water and will not leave stains on the sprayed surfaces.

Lavender Air Freshener & Odor Neutralizer

ENVIRONMENTALLY RESPONSIBLE COMPARISON			
Traditional Products		ECOSPHERE	
Tap Water		None	
Nonylphenol ethoxylates		None	
Zinc Ricinoleate		None	
Propellants		None	
		USP DI Water	
		Linear Alcohol Ethoxylate*	
		Ordenone Deodorizer Concentrate	
VOC < 18%		VOC : None	
Traditional Compound Descriptions:		ECOSPHERE Compound Descriptions:	
 Tap Water - May leave water stains from spray. Nonylphenol ethoxylates - a nonionic surfactant that is used to provide wetting and detergency. However, it is derived from a petroleum-based product. It has a suspected harmful biodegradable intermediate. Zinc Ricinoleate - a highly effective deodorant/malodor absorber. Trace amount of zinc may cause problems with toxicity of sewage effluent and meeting discharge permit requirement. 		 USP DI Water - Purified water leaves no water stain. Linear Alcohol Ethoxylate* - listed as Positive Environmental Profile surfactant on EPA design for the Environment Formulator Initiative. A non-ionic surfactant made from linear primary alcohol that biodegrades readily to compounds with low toxicity. Ordenone Deodorizer Concentrate - a patented, metal-free, water-based proprietary blend that features a semi-rigid, concave molecular structure. It has a unique ability to "capture" malodor molecules and hold them hostage.
